

# Science Interactive Notebooks

# ISN

## Interactive

Working with  
another  
person or  
thing

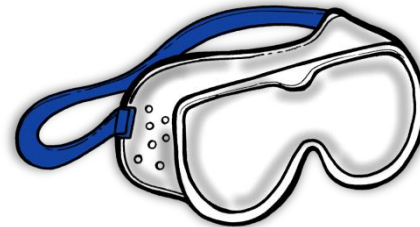

## Science

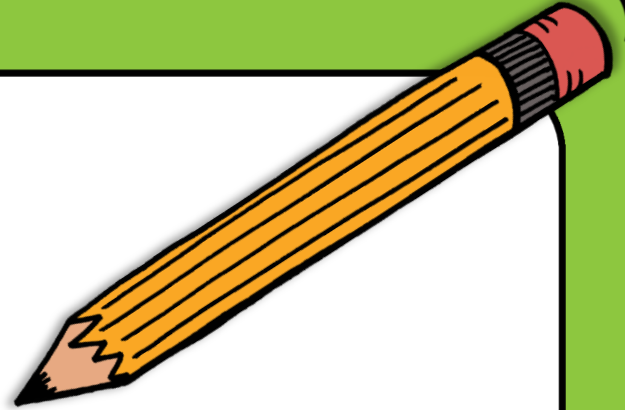

Using  
experiments  
and  
observations  
to explain  
why and how  
things happen

## Notebooks

Book to keep  
notes,  
pictures,  
questions, etc.

# What is a ISN?

It is YOUR VERY OWN “science textbook.” You will be able to use your **CREATIVITY** to not only keep track of our new learning but also to expand on it. You will keep class notes, activities, and your thoughts in this one place. Your ISN will be organized in a way that is easy for you to look back for information when you need to. (Just like when we revisit the text we are reading to clarify information!)

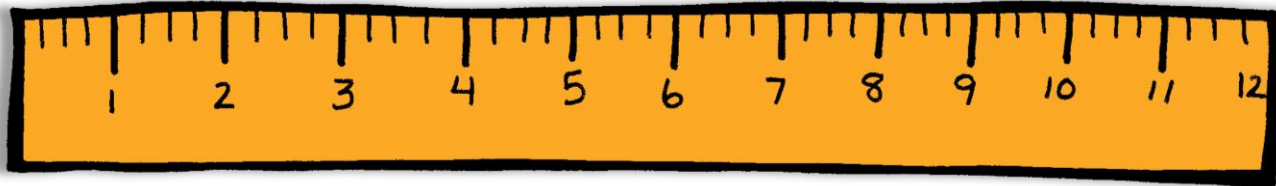

# Why Use Them?

Keeps all of your learning in ONE place! No papers in the trashcan, at home, etc.

Allows you to revisit topics already learned.

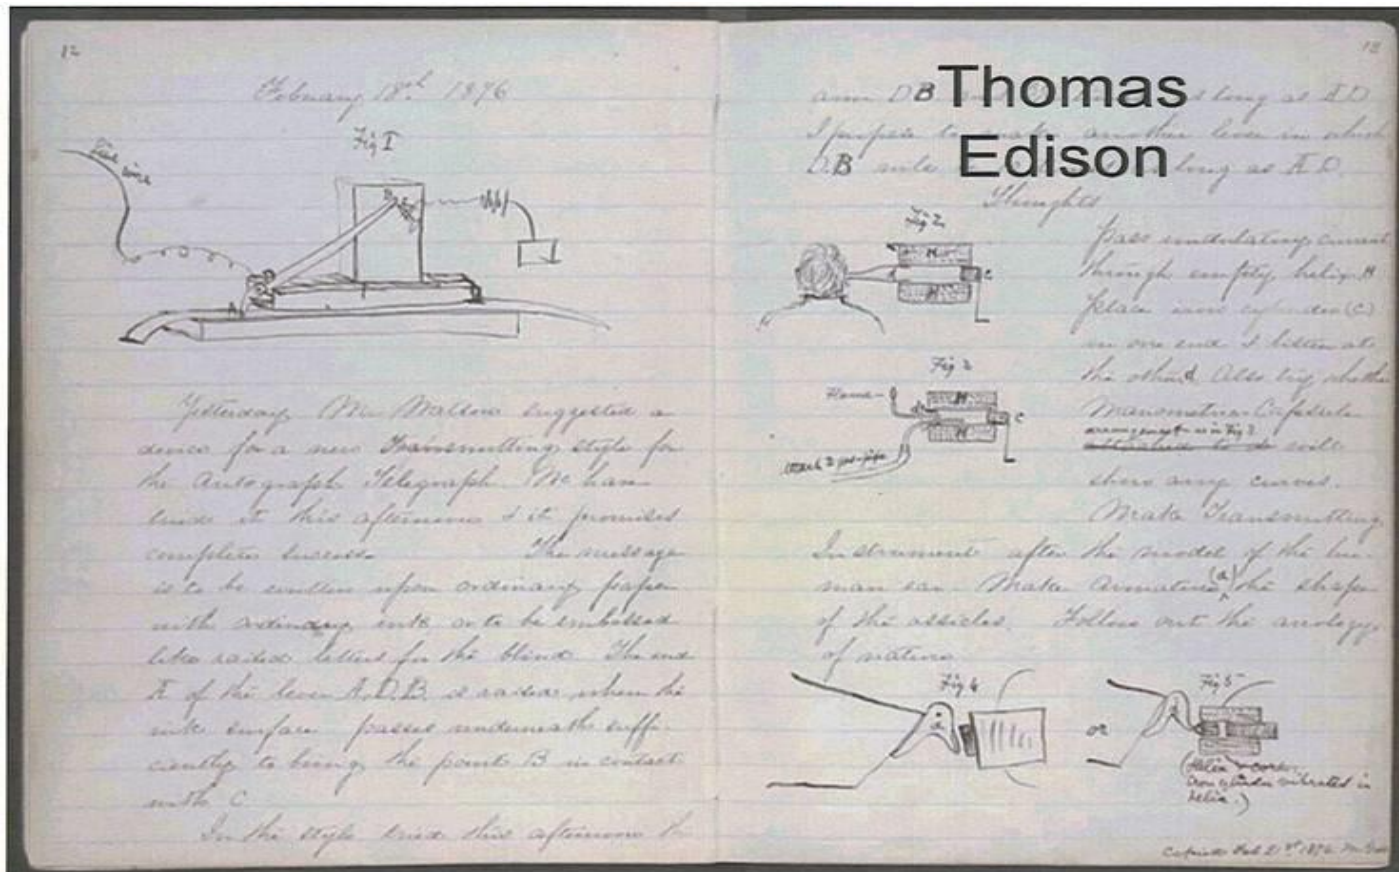

Allows you to add how you think & feel about topics we learn.

Improves your writing skills.

# Famous Scientists Use Them!

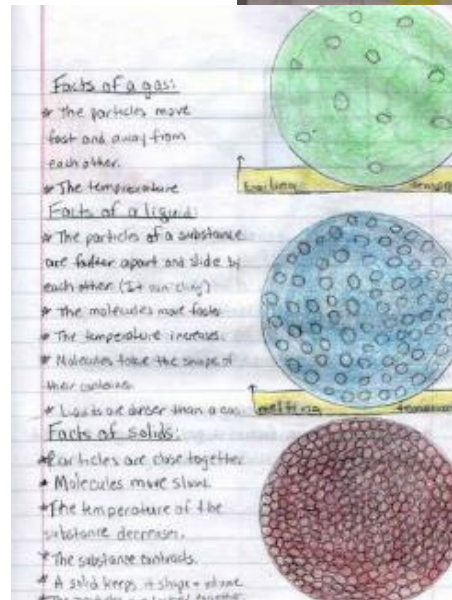

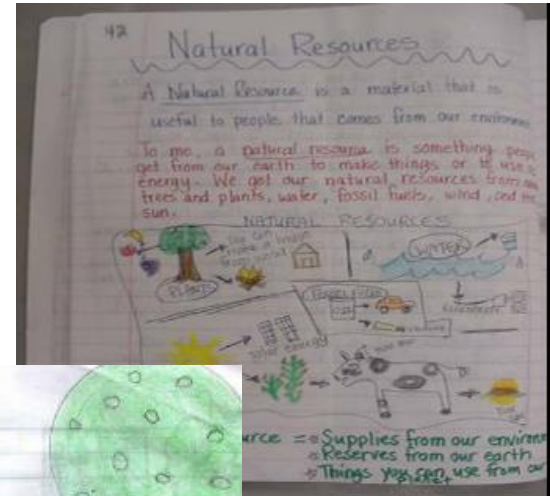

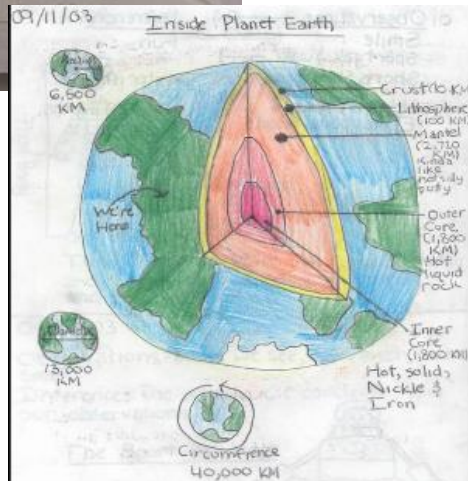

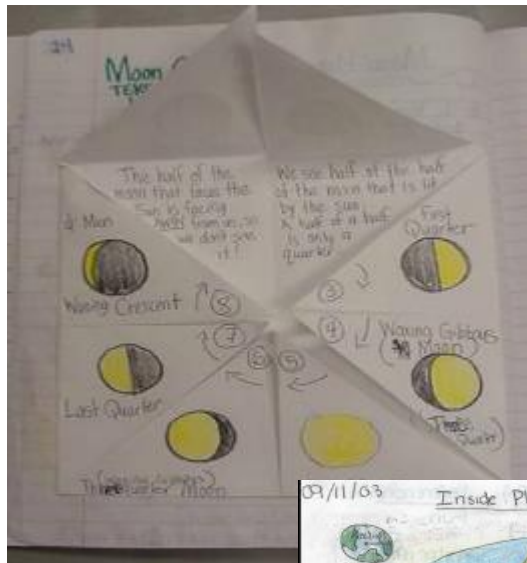

# What DO They LOOK Like?

Lab Activities

Data from Experiments

Assignments

# RULES

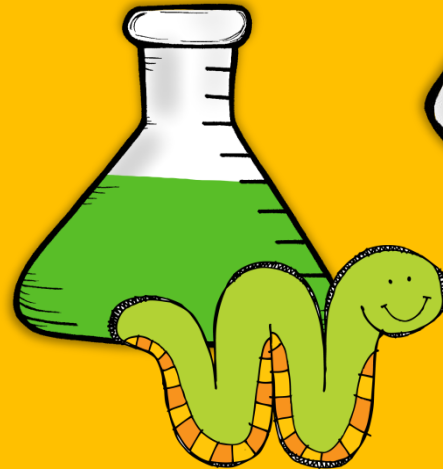

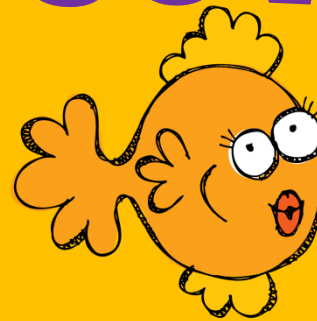

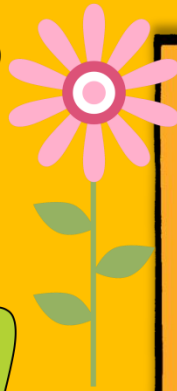

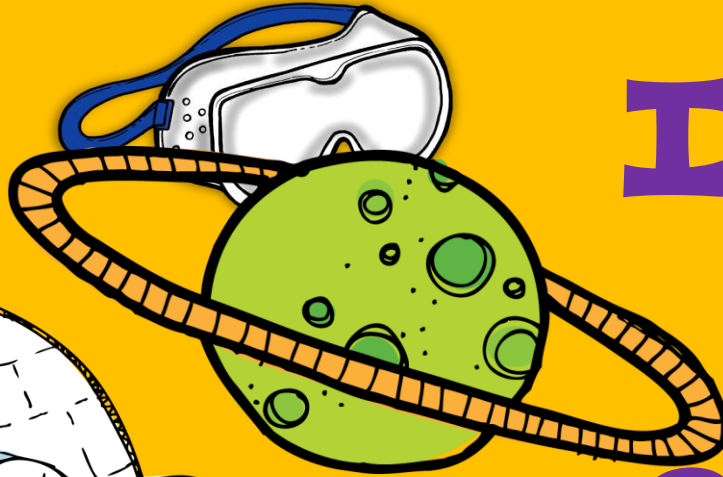

- No RIPPED OUT pages or torn corners
- No DOODLING that doesn't relate to science
- Notebook should only be used for and during  
SCIENCE CLASS
  - DATE and NUMBER every page
- ALL ENTRIES must go in the Table of Contents
- Be **COLORFUL** and love your notebook!

# We Will...

- Decorate our cover
- Create the Table of Contents
- Glue in Safety Contract
- Number Pages
- Complete the All About the Author

# Ideas for cover
